## On Vacation? What about the Plants?

Containers need watering on a regular basis in the heat of the summer, but that is also the time when most families go away on vacation. Some people prefer to get a neighbor to water the plants along with feeding the family pets, but others need to be a little more creative. In assessing the needs of the container you will need to figure out the best way to keep them alive by:

### First consider how large your container is.

Obviously smaller hanging baskets take more water than very large patio containers.

### The second consideration is where the container is and how much direct sun the container gets.

**Finally consider the plants themselves.** Some plants are more drought tolerant than others. With these considerations in mind you can gauge whether the plants will survive alone without your care. If they can, water them well before you go and remember to water again when you return.

## Summertime

Hot Fun in the Summertime! Nothing says summer like a beautiful, colorful spread of flowers. It naturally brings a smile to your face. Many of us realize how powerful flowers are in the way we arrange them in vases, flower beds, baskets, etc. It lifts the spirits, it provides a wonderful aroma and visually, it is exceptionally pleasing.

Consider letting Manhattan Plant Design Experts arrange a beautiful flower setting in your office that will bring joy to all your fellow workers and visitors. We've got the years of experience and expertise to produce great feelings and smiles in your environment in the way we customize your work environment with incredible, happy flower arrangements to uplift spirits and motivate you to feel your best.
